### **Questions for discussion**

1. What prisons/detention centers are located in this area? Who has first-hand experience dealing with these institutions and who is currently incarcerated there?
2. What can anti-prison organizing look like in practice, both on the inside and outside?
3. Are there prison abolition initiatives in the area? If so, how could you get involved? If not, what would starting something like that look like?
4. How can we build networks of solidarity that go across prison walls?
5. Prisons require many moving parts to function, guard companies, supply chains, etc. How can these different entities be targeted to disrupt the functioning of the prison system?
